TAC meeting must be a place for open dialog leading to the successful development of a comprehensive PRO/CON analysis on the various project alternatives. We agree and acknowledge that this process demands time and patience and the engagement of the community.

As volunteers working on behalf of the entire community, we will develop this analysis based on clear, objective, and accurate information. We encourage input and participation from the community and have the following meeting expectations:

- *We expect all participants to avoid creating opportunities for harassment, intimidation and conflict. Constructive dialog is not possible with interruptions and distractions.*
- *We will listen and ask for the clarification and accuracy of statements.*
- *We will respond as appropriate so that the flow of information is constructive and informative.*
- *We will present the agenda items and commit to staying on topic so that our meetings are productive and provide information for consideration.*
